

# DIRIS A-20

## Multifunction measuring unit - PMD

measurement and monitoring - door mounting

#### Function

DIRIS A-20 units are performance metering and monitoring devices that provide the user with all of the measurements needed to complete energy efficient projects successfully and to provide assured monitoring of electrical distribution.

All of this information can be used and analysed remotely with the help of energy efficiency software programs.

#### Advantages

#### User-friendly operation

With its large backlit multiple-display screen with 4 hot keys, the DIRIS A-20 is easy to use.

#### Compliant with IEC 61557-12

Reference standard for PMDs (Performance metering & monitoring devices), IEC 61557-12 guarantees performance levels and satisfactory performance from the PMDs under the environmental conditions typical of industrial and tertiary applications.

#### Detects wiring errors

The DIRIS A-20 is equipped with an error correction function for CT connection.

#### Customisable

Additional communication and input/ output modules can extend the basic functional scope of this product. Equipped with additional modules, the DIRIS A-20 can provide the user with flexibility and expandability throughout the service life of the product.

#### Functions

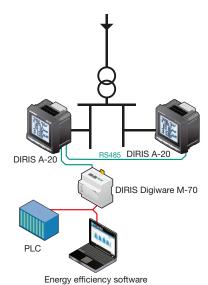

#### Multi-measurement

- Currents
- instantaneous: I1, I2, I3, In
- maximum average: I1, I2, I3, In
- Voltages & frequency
- instantaneous: V1, V2, V3, U12, U23, U31, F Powers
- instantaneous: 3P, ΣP, 3Q, ΣQ, 3S, ΣS - maximum average: ΣΡ, ΣQ, ΣS
- Power factors

270

- instantaneous: 3PF, ΣPF

#### Recommendation

- For IT earthing systems, it is recommended that the CT secondary is not connected to earth.

- When disconnecting the DIRIS, the secondary of each current transformer must be short-circuited. This operation can be carried out automatically by a SOCOMEC PTI, which can be found in the SOCOMEC catalogue: please consult us.
